

Jupyter Server Login

For the command line activities, we'll be using a Jupyter server, which you can login to using your Google account. To login:

1. Visit <https://github.com/zemkat/OLAC2017/> and click the link to the Jupyter server.
2. Click the orange button, and login with your Google account:

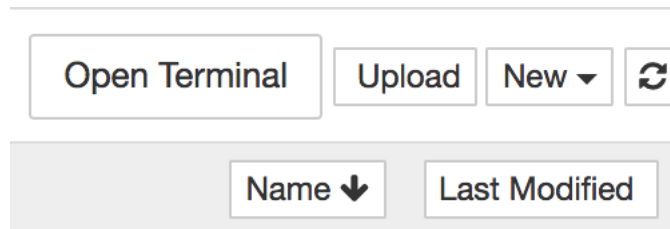

Sign in with Google

3. Start your server with the green button:

Start My Server

4. You will see some files you can browse, but we'll mainly be using the Terminal. To access this, click the "Open Terminal" button on the right side of the screen:

You should now be logged in to a Terminal, and ready for the activities!
