Jupyter server login

For the command line activities, we'll be using a Jupyter server, which you can login to using your Google account. To login:

1. Visit https://github.com/zemkat/OLAC2017/ and click the link to the Jupyter server.

2. Click the orange button, and login with your Google account:

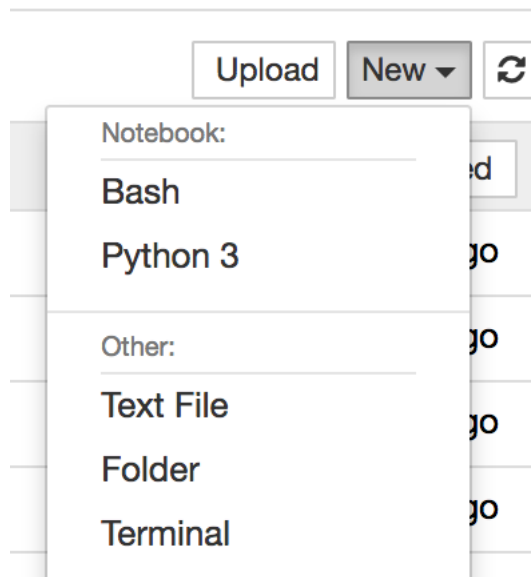

3. Start your server with the green button:

4. You will see some files you can browse, but we'll mainly be using the Terminal. To access this, use the "New" menu on the far right, and select Terminal from the options:

You should now be logged in to a Terminal, and ready for the activities!
